

Single Premium Deferred Index Annuity

Issued by Ameritas Life Insurance Corp. Lincoln, NE

AL1003v0818

My Choice: "I plan to retire early and spend every day on the ski slopes until my body calls it quits."

# **DEFINE MY FUTURE**

**THE FUTURE** isn't limited to retiring from the workplace only to watch time and money diminish. A modern retirement is about embracing the years ahead and their expanded possibilities. For some, retirement is a time to travel the world, learn new things, and engage in opportunities that time didn't afford them during their working years. For others, a thriving retirement is all about giving back to the community, making connections, or spending quality time with those they love.

### What does your future look like?

Whether you're gearing up for some much-needed time to do the things you love or are preparing to take on the world, your future is full of possibilities. A FlexMark Select<sup>™</sup> index annuity is here to help you realize your goals and experience retirement *your* way.

# CHOOSE MY PATH

FlexMark Select<sup>™</sup> is built on a foundation of choice and flexibility. It allows you to choose your retirement path and even change directions when plans change. You will have the opportunity to make selections that will allow you to create your own path to retirement success.

When you choose FlexMark Select<sup>ss</sup> to prepare for your future, you're choosing a product that can help you create financial security on your terms.

GLWB income riders are not available with certain tax-qualified plan types. Upgraded riders are available for a current annual charge of 0.95% for the MyFit Income Rider<sup>SM</sup> and 1.05% for the MyFit Income Rider<sup>SM</sup> With Booster (not available in all states).

<sup>\*</sup> Fee options are not available in MN, PA, UT, or WA.

### **Product Version**

You have the choice of a FlexMark Select<sup>™</sup> product that will help you meet your financial goals: a product with a vesting premium bonus to help jump-start your earnings, or a nonbonus product that offers stronger interest crediting rates.

#### Bonus

A vesting premium bonus is calculated as a percentage of your premium, and is placed into a separate account called the bonus account.

#### Example:

\$100,000 premium x 6% bonus

#### = \$6,000 bonus

The bonus applies on all premium received in Year 1. It begins earning interest immediately (also held in the bonus account). The bonus account vests into your annuity over a period of 10 years, according to a vesting schedule. Once it is fully vested, the bonus account will be added into your annuity's accumulation value.

The policy's death benefit includes the full bonus account (vested and non-vested). If you surrender your policy or take withdrawals, the bonus account will reduce proportionately to the surrender or withdrawal amount.

### SELECT MY PRODUCT

### My Choice:

"I chose a product with a premium bonus because it boosts my earnings right away and is available for my beneficiaries if I die."

### No Bonus

By offering stronger interest crediting rates than similar bonus products, FlexMark Select<sup>™</sup> no-bonus products allow your money more growth opportunity.

A no-bonus product is a wise choice for people who are focused on maximizing their growth potential. Also, a no-bonus product is recommended for those who anticipate taking withdrawals, because the bonus account is reduced by withdrawals.

To learn more about the vesting premium bonus option available to you, please refer to the accompanying product insert.

#### My Choice: "By putting \$200,000 or more into my FlexMark Select<sup>™</sup> annuity, I know my money has the opportunity to work harder for me."

### **Premium Amount**

You determine the right amount of money to put in your annuity during the first policy year to help you best achieve your financial goals. FlexMark Select<sup>™</sup> allows for premium amounts of \$25,000 to \$1,000,000 and, during the first year, additional premium amounts of at least \$5,000. It also offers two bands of interest crediting rates.

For initial premium of \$200,000 or more, you'll be rewarded with higher interest crediting rates, giving your money opportunity for greater earnings. Over the life of the policy, upgraded band rates will apply as long as your accumulation value remains at \$200,000 or more. If your accumulation value is below \$200,000, you can be bumped into the upgraded band for the next interest crediting period if your accumulation value reaches or surpasses \$200,000. You can also move from the upgraded band into the standard band if your accumulation value becomes less than \$200,000.

6

#### MY STRATEGIES My Choice:

SELECT

"I plan to take some withdrawals to pay for world travels and don't want to miss out on index credits, so I allocated some of my money to the fixed account."

**Cap**—A maximum rate of interest that will be credited to the annuity. For example, if the market increases 10% over the index period, and the cap is 6%, interest credited would be 6%.

#### Participation Rate: 75%

Participation Rate—A percentage that is multiplied by the percent of index change to determine interest credited to the annuity. For example, if the market increases 10% over the index period, and the participation rate is 75%, interest credited would be 7.5%.

### Interest Crediting Strategies

Your annuity's growth potential is driven by your selection of interest crediting strategies. FlexMark Select<sup>™</sup> offers a variety of strategies that will help you achieve your financial goals.

**Fixed Account**—The fixed account offers a competitive interest rate that is guaranteed\* for a 12-month period. Interest accrues daily and is credited monthly rather than at the end of the 12-month period, making the fixed account a suitable choice for a portion of your money if you anticipate taking periodic withdrawals.

**Index Options**—An index option is a type of interest crediting strategy that calculates the interest rate based on the performance of a market index,\*\* such as the S&P 500<sup>®</sup>. FlexMark Select<sup>™</sup> offers multiple index options tied to various indices, allowing diversification within your annuity.

When you allocate your money to an index option, you have the opportunity to benefit from market gains without exposing your money to market declines. That's because interest credited will never be less than 0%. In exchange for this protection, interest credited is limited to a percentage

Interest credited on the index options is limited to a cap, participation rate, or both.

<sup>\*</sup> Guarantees are based on the claims-paying ability of Ameritas Life Insurance Corp.

<sup>\*\*</sup> Keep in mind that you're not actually participating in the market or investing in any stock or bond.

of market increases (a participation rate) and/or an earnings ceiling (a cap). FlexMark Select<sup>™</sup> offers index options that include a cap, participation rate, or both.

You have the ability to transfer your money at the end of each index period into any available interest crediting strategy, allowing you the flexibility to adapt to changing sensibilities and times.

# FlexMark Select<sup>™</sup> gives you the choice of a no-fee or fee version of each index option.

• *Fee Option*—In exchange for paying a fee, you will receive higher caps and/or participation rates than are available on the no-fee option. This translates to the opportunity for greater earnings. Index options with a fee are an excellent choice if you are looking to maximize your growth potential. Fee options are not available in MN, PA, UT, or WA.

- *No-Fee Option*—If you're not interested in paying a fee, a traditional no-fee option, which offers competitive rates, is a solid choice.
- Fee and No-Fee Combination—FlexMark Select<sup>™</sup> allows you the flexibility to diversify your money among all available crediting strategies. That means you can split your premium among fee options, no-fee options, and the fixed account allowing you to customize your accumulation path.

To adapt your earnings approach as you see fit, you have the ability to transfer your money into or out of the fixed option, fee option(s), or no-fee option(s)—or a combination thereof— at the end of each index period.

For descriptions of available index options, including hypothetical examples that provide a performance comparison of fee and no-fee index options, refer to the accompanying index option inserts.

### Guaranteed Lifetime Withdrawal Benefit Riders

Part of planning for the future is ensuring that you can experience the retirement of your choice without running out of money. After all, is it truly possible to enjoy the retirement you intended if you're worried that your funds won't last as long as you do? FlexMark Select<sup>™</sup> offers multiple rider options to address this concern.\*

#### The Guaranteed Lifetime Withdrawal Benefit

(GLWB) rider, commonly known as an income rider, allows you to turn on a retirement "paycheck" while your annuity continues to earn interest. With a steady income stream that you are guaranteed not to outlive—even if your accumulation value depletes to zero—you can focus on enjoying retirement in the way you intended.

**Basic GLWB Income Rider**—At no cost to you, the Basic GLWB Income Rider is included with your FlexMark Select<sup>™</sup> annuity.\* This no-cost income rider consists of three phases: the accumulation phase, the withdrawal phase, and the guaranteed phase.

• Accumulation Phase—During the rider's accumulation phase, which begins when your policy is issued, your Premium Accumulation Value (PAV) grows. Though the PAV is not an amount that can be surrendered, withdrawn, or paid as a death benefit, it is important because it helps determine the amount of your lifetime payments. The higher it grows, the greater your income payments will be. The PAV equals your premium plus interest growing at the Premium Accumulation Rate of 3% compounded annually for the earlier of 10 years or until you start taking withdrawal payments in the withdrawal phase.

If you choose to take a withdrawal from your FlexMark Select<sup>™</sup> annuity during the rider's accumulation phase, your PAV will be reduced proportionately to the change in the policy's accumulation value and vested bonus account (if applicable).

### select My **Rider**

*My Choice:* "I don't *think* I'm going to need income, so the no-cost income rider is perfect for me. It's reassuring to know that it's available if I need it."

The rider's accumulation phase ends the day before rider withdrawal payments commence.

• Withdrawal Phase—During the withdrawal phase, you will receive a guaranteed income stream of your FlexMark Select<sup>™</sup> accumulation value. You can begin payments once you reach age 50 and the rider has been in force for five years. You have the choice of receiving annual, semiannual, quarterly, or monthly withdrawals.

When you elect to begin receiving withdrawal payments, the greater of the PAV or the policy's accumulation value plus any vested bonus account is used as the benefit base, a value that is multiplied by your lifetime distribution factor to determine your Lifetime Withdrawal Benefit Amount (LWBA).

<sup>\*</sup> GLWB income riders are not available with certain tax-qualified plan types.

| 80+                              | 6.25%               | 6.00%                 | 5.90%  |

\* In states that use unisex factors, female factors apply.

\*\* The joint spousal option applies when there are joint annuitants/joint owners.

The LWBA is your maximum annual payment under the rider. If you take an excess withdrawal, which is any withdrawal greater than the LWBA, the benefit base will be reduced, which will, in turn, reduce your payments. The reduction in the benefit base due to an excess withdrawal may be greater than the dollar amount of the excess withdrawal.

Each year during the withdrawal phase, you have the opportunity for a step up, which is an increase in the benefit base. If the policy's accumulation value plus any vested bonus account is greater than the benefit base on any rider anniversary, the benefit base will increase, or step-up, to equal the policy's accumulation value plus any vested bonus account. The LWBA is then recalculated using the original distribution factor and stepped-up benefit base, giving you the opportunity for a greater income stream.

• Guaranteed Phase—Once your FlexMark Select<sup>™</sup> policy's accumulation value plus any vested bonus account reaches zero, the guaranteed phase begins. During this phase, you will continue to receive a steady income stream for life, as selected, even though your annuity's values have reached zero, addressing concerns about longevity and eliminating any question about how long your income will last. Payments end only upon the death of the last surviving covered person. No additional step-ups will occur during this phase, and no death benefit remains.

**MyFit Income Rider**<sup>SM</sup> (**Traditional GLWB**)—When you purchase your FlexMark Select<sup>SM</sup> annuity, you have the option to upgrade your Basic GLWB Income Rider to the MyFit Income Rider<sup>SM</sup> for an annual charge. With the MyFit Income Rider<sup>SM</sup>, you can select the rider features that fit your retirement income needs to tailor a rider that is personal to you.

This rider works in the same manner as the Basic GLWB Income Rider but offers upgraded features, including larger paychecks for life. It also gives you the choice between traditional, level payouts or a lifestyle payout, allowing you to customize your payments to your retirement story. To learn more about the MyFit Income Rider<sup>5M</sup> and the lifestyle payout option, please refer to the accompanying MyFit Income Rider<sup>5M</sup> brochure.

MyFit Income Rider<sup>™</sup> With Booster (Traditional GLWB With Income Booster)—For a truly flexible income rider that can adapt to your changing needs, when you purchase your FlexMark Select<sup>™</sup> product, you have the option to upgrade to the MyFit Income Rider<sup>™</sup> With Booster for an annual charge. This income rider is the same as the upgraded MyFit Income Rider<sup>™</sup>, but has the added benefit of an income booster, which can increase payments if your health declines. For complete details about the MyFit Income Rider<sup>™</sup> With Booster, please refer to the accompanying MyFit Income Rider<sup>™</sup> brochure.

# ACCESS MY VALUES

Your FlexMark Select<sup>™</sup> annuity provides better earnings opportunity when you allow your assets to grow over the long term. However, when the future becomes the present, unforeseen opportunities or issues may arise that will require you to access your money. You may fully surrender your policy at any time before the maturity date for the surrender value, which is equal to the greater of (a) the accumulation value less any surrender charge, and any market value adjustment (MVA), if applicable, or (b) the minimum guaranteed surrender value (see Page 13). FlexMark Select<sup>™</sup> offers several ways to withdraw your accumulation value without incurring penalties, giving you freedom and flexibility to respond to life's changes.

**Penalty-Free Withdrawals**—Each policy year after the first, you may withdraw up to 10% of your beginning-of-year accumulation value without incurring surrender charges or a market value adjustment. You are free to use this liquidity feature to carry out an income plan or to respond to life's unexpected events. The minimum withdrawal amount is \$250.

**Required Minimum Distributions**—If your annuity was issued in connection with a tax-qualified plan, the Internal Revenue Service (IRS) may require you to take minimum distributions beginning at age 70½. Per current company practice, any required minimum distribution (RMD) amount associated with this policy may be withdrawn without penalty, beginning in the first policy year. For all transfers and rollovers, RMD amounts should be withdrawn prior to the transfer request. All withdrawals taken in the same calendar year will count toward your RMD amount.

**10% Emergency Access**—In addition to annual penalty-free withdrawals, FlexMark Select<sup>™</sup> offers a one-time free withdrawal benefit, available after the first policy year, to help respond to life's emergencies. You may withdraw up to an extra 10% of the accumulation value without incurring surrender charges or an MVA if you experience an emergency event.

Waiver of Surrender Charge Riders—Provided to you at no additional cost, the waiver of surrender charge riders may allow you to withdraw funds when your health declines without incurring surrender charges or an MVA. To qualify for a waiver, you must have been an owner continuously since the policy date. The annuitant is the qualifying person if the policy is owned by a trust or other legal entity. The waiver of surrender charge riders may vary by state and may not be applicable in all states.

- Confinement—At any time after policy issue, if you become confined for at least 30 consecutive days to a qualified institution, surrender charges may be waived on withdrawals. To qualify for the waiver, you must not have been confined within one year prior to the policy date.
- Home Health Care—At least two years after the policy date, if you need home health care services from a licensed home health care service agency due to impairment in performing at least two of six activities of daily living (bathing, dressing, transferring, toileting, continence, and eating) you may qualify for a waiver of surrender charges. You must not have been confined or required home health care services within one year prior to the policy date.

• *Terminal Illness*—If, after the policy begins, you become diagnosed with a terminal illness that results in a life expectancy of 12 months or less, surrender charges may be waived on withdrawals.

**Surrender Charges**—If you choose to access your funds during the policy's first 10 years, and one of the available penaltyfree options doesn't apply, surrender charges will apply to withdrawals or surrenders. The charge is a percentage of the amount accessed. Refer to the accompanying product insert for surrender charge percentages specific to your FlexMark Select<sup>™</sup> product.

**Market Value Adjustment**—A market value adjustment (MVA) is a positive or negative adjustment made in response to market conditions. It applies anytime a surrender charge is assessed during the policy's 10-year surrender charge period (in addition to the applicable surrender charge). An MVA does not apply when funds are accessed penalty-free; the actual MVA amount may vary by state, and an MVA may not be applicable in all states.

Depending on the change in the interest rate environment since you purchased your annuity, the MVA may increase or decrease the amount of the withdrawal or surrender. The MVA is calculated based on a formula that takes into account changes in yields of Barclays US Credit Index between the date your policy was issued and the date of your withdrawal.

*Positive MVA*— The MVA will *increase* your surrender value by no more than the remaining surrender charge if interest rates have fallen since you purchased your annuity.

*Negative MVA*—The MVA will *decrease* your surrender value to no less than the minimum guaranteed surrender value if interest rates have risen since you purchased your annuity.

# PROTECT MY MONEY

FlexMark Select<sup>™</sup> index annuities offer multiple layers of guarantees to help grow and protect your hard-earned dollars.

**Contractual Guarantee**<sup>\*</sup>—FlexMark Select<sup>™</sup> provides a solid contractual guarantee to shield your funds from an economic downturn. If for any reason you decide to surrender your policy, your surrender value will never be less than the **minimum guaranteed surrender value (MGSV)**, which is equal to:

- 1.87.50% of premium applied to the accumulation value; less
- 2. Partial withdrawals; plus
- **3.** Interest credited daily at the non-forfeiture interest rate shown on the policy schedule.

\* Guarantees are based on the claims-paying ability of Ameritas Life Insurance Corp.

Interest Crediting Strategy Guarantees\*—In addition to the overall contractual guarantee, FlexMark Select<sup>™</sup> offers guarantees at the strategy level. The minimum declared rate for each strategy will never be lower than the guaranteed rate shown on the accompanying index option insert or your policy schedule. Additionally, although you could earn 0% interest in the index options for one or more index periods, your accumulation value is always protected from the market's downside risk.

# ANNUITIZE MY POLICY

In a process known as annuitization, you may turn your full accumulation value, which includes any vested portion of the bonus account, into an irrevocable income stream. You may annuitize your policy at any time up to the maximum maturity date shown on your policy schedule. Surrender charges do not apply upon annuitization after the fifth policy year.

FlexMark Select<sup>M</sup> offers several annuity options for disbursement of your annuity payments, including Life Income and Installment Payments. You have the choice to receive equal annual, semiannual, guarterly, or monthly annuity payments for the life of the annuitant or for the number of years selected (from five to 30 years). For surrender-charge free annuitization after Year 5, a minimum of 10 years or life option is required by administrative practice. Proceeds applied under any annuity option may not be surrendered or otherwise withdrawn.

# LEAVE MY LEGACY

In case you don't live forever, FlexMark Select<sup>55</sup> offers a reliable death benefit to help leave a legacy for your loved ones. Death benefit proceeds will be paid directly to your chosen beneficiary and are generally free from the hassles, publicity, and delays of probate.

If you die prior to the policy's maturity date (the date on which annuity payments begin), the death benefit is the greater of your accumulation value plus any bonus account or the minimum guaranteed surrender value. Your beneficiary has the option to receive the death benefit any time within five years of your date of death and may choose to receive a lump-sum payment or a series of payments under an available annuity option. If the beneficiary is your spouse, he or she may choose to continue the policy as owner.

<sup>\*</sup> Guarantees are based on the claims-paying ability of Ameritas Life Insurance Corp.

If you die after annuity benefit payments have begun, the remaining amount of the annuity benefit (if any) will continue to be paid to your beneficiary under your selected annuity option.

# DEFER MY TAXES

Index annuities like FlexMark Select<sup>™</sup> allow you to wait until withdrawals are taken to pay taxes. When your earnings are allowed to grow tax-deferred, interest on those earnings compounds, allowing you to earn interest on your interest, on your principal, and on the sums you would otherwise have to withdraw to pay taxes on a taxable account. This effect, often referred to as triple compounding, allows for greater earnings potential and may help you outpace inflation.

# TRUST MY INSURER

Founded in 1887, Ameritas Life Insurance Corp. and its affiliated companies provide a wide range of insurance and financial products and services to individuals, families, and businesses throughout the United States. Offering one of the strongest balance sheets in the industry, Ameritas has an established, proven foundation of stability that you can trust. Its longstanding financial health provides the strength and security that customers expect, reflected in consistently strong ratings earned from independent ratings agencies.

# EXPLORE MY OPTIONS

For more information on FlexMark Select<sup>55</sup>, including current features available to you, or to discuss whether FlexMark Select<sup>55</sup> may be right for you, we recommend you contact the insurance professional who provided you this brochure.

To service an existing policy, including reviewing accumulation values, making changes to your interest crediting strategy allocations, electing withdrawals, or changing beneficiary designations, you may contact your insurance professional or Ameritas Client Services at 800-262-2360, Monday through Friday.

Products are designed in conjunction with Ameritas and exclusively marketed by Legacy Marketing Group®:

Vour future is our business.

dba: Legacy Marketing Insurance Services (CA Only) 2090 Marina Avenue, Petaluma, CA 94954-6714

Ameritas and Legacy Marketing Group® are separate, independent entities.

In approved states, FlexMark Select<sup>™</sup> Index Annuities (Form 2705) and riders are issued by Ameritas Life Insurance Corp (Ameritas). Policies, index strategies, and riders may vary and may not be available in all states. Optional features and riders may have limitations, restrictions, and additional charges except where noted.

FlexMark Select<sup>™</sup> Index Annuities are single premium deferred annuities that offer a fixed interest option and index interest options. Annuities with an index option may be referred to as equity index annuities. The index options are not securities; you are not investing in stocks or in the indexes themselves. Therefore credited interest does not include dividends paid by companies included in the relevant index. The credited interest rate is linked, in part, to gains in any combination of indexes. Keep in mind, you are not actually participating in the market or investing in any stock or bond. Guarantees are based on the claims-paying ability of Ameritas Life Insurance Corp.

Withdrawals of policy earnings are taxable and, if taken prior to age 59½, a 10% penalty tax may also apply. The information presented here is not intended as tax or other legal advice. For application of this information to your specific situation, you should consult an attorney.

This brochure must be accompanied by the index option inserts, the product insert for surrender percentages, and the MyFit Income Rider<sup>™</sup> brochure.

Standard & Poor's 500<sup>™</sup> Index is comprised of 500 stocks representing major U.S. industrial sectors. S&P 500 and Standard & Poor's 500<sup>™</sup> are trademarks of Standard & Poor's and have been licensed for use by Ameritas Life Insurance Corp. The product is not sponsored, endorsed, sold or promoted by Standard & Poor's and Standard & Poor's does not make any representation regarding the advisability of investing in the product.
